

98C Learning Loss Plan (09/19/22)

Rogers City Area Schools recognizes that learning loss has taken place with many students, especially the current 3rd grade. This is due to the fact that this group of students were dismissed early during the 2019/20 school year and they have had in person instruction interrupted during the COVID time period. Our goal is to ensure that they recover from these lapses by separating or reducing the amount of students per class in this grade level. The reduction will allow a general education teacher to target, especially in the area of reading, students of concern. The district will utilize Acadience to monitor the students' progress and create reading plans to provide support to parents.
